**Annotation:** in the process of writing the article, special attention was paid to the field of culture today etbor judda katta. Ma 'Denmark is within every country ,Nations border. Ma' keeping the grain in its pure state is also covered by the maturation of the offspring as a legacy ,and in our activities today we are talking about the correct interpretation of our ore.  
**Keywords:** culture, culture, word, text, skill, scene. action, strategy development, strategy.

**Introduction:** the level of development of our people is assessed, first of all, according to our national culture. In this sense, culture is the image of our people, society. As long as we have begun to create a new image of Uzbekistan, we must first of all start with the development of our national culture<sup>4</sup>.

Shavkat Mirziyoyev President Of The Republic Of Uzbekistan

The speaker from the past, present and future of each nation is its culture. Our people, with their rich culture and art, today occupy a special place in the world community. It will not be an exaggeration to say that many works of note have been carried out, especially in these five years.

In particular, on February 7, 2017, the “strategy of action” developed by our Honorable President served as a kind of program for the prosperity of the country and was an important factor in the implementation of comprehensive work. Chuponchi, one of the 4 priorities of the strategy, has done extensive work on the ground on the “development of the social sphere”.

Measures related to the employment of the population, especially young people, the social protection and health of citizens, the improvement of Science, Education, Culture and sports, Road transport, Engineering and communication and the development of social infrastructure have been implemented<sup>5</sup>.

The concept of “New Uzbekistan”, promoted by the head of our state in today's rapidly developing time, has also sounded in a unique way in the language of our people

and is encouraging a new worldview, a step towards thinking. After all, as our president said, “today Uzbekistan is not yesterday's Uzbekistan, today's khalimiz is not yesterday's people.”

The main part: the law of the Republic of Uzbekistan “on cultural activities and cultural organizations”, adopted by the legislative chamber and approved by the Senate on January 6, 2021, is also extremely important in regulating cultural activities, relations in the field of activities of cultural organizations, supporting the creator, creative team, creative activity.

Cultural events in our country concert-performance activities are a program on popular creativity, folk games, activities of cultural centers, strengthening cooperation in the field of national cultural centers, cultural activities, popularization of cultural objects and works of art, development of culture in remote areas, social protection of cultural workers.

As an example of the high attention paid to the industry and representatives of the industry, we can also see the date of April 15 in the designation of exactly “culture Staff day”. On the eve of this joyful day, on the initiative of the Ministry of Culture, the establishment of an “artists ' Park” in the nurabad fortress, the educational center of the Ohangaron District of the Tashkent region, was like a wedding, to say, no exaggeration.

This reality, which was never observed before, pleased the employees of the industry benihoya seven. This historical reality was welcomed and delighted by the employees of the industry. We will not be mistaken if we say that they were motivated to fulfill their duties more diligently.

The work carried out on the path of prosperity of culture and art in our country is extremely in harmony with the priority measures aimed at ensuring spiritual progress and bringing the sphere to a new level, which are reflected in the development strategy of the New Uzbekistan.

We can say that these reforms contribute to the vital realization of the idea “from the strategy of action - towards the strategy of development”, based on the principle of goodness and humanity, to the implementation of the concept “new Uzbekistan - enlightened society”.

Each nation occupies a strong place from World Tamadun with the power of its culture and art. It is the development of this sphere that is considered one of the important factors that demonstrate the strength and potential of the country, the dignity of the people, the prestige and status of the world<sup>6</sup>.

There are words in the world that are very impudent, ugly, rude and negative. They bring a person into a chilling state of the mirror of the heart of the heart, even without leaving the tongue.

It is necessary for everyone to understand the expression of the power of words. The reason is it is possible to destroy the whole world with just one lie or a joke word. The word means the power of power. It is worth noting that it is necessary for each person to

wish peace not only to himself, but to the whole world. In vain, our people did not argue: ‘El peaceful – you peaceful.’”

In fact, every wish and desire are intertwined. In a single word, it is possible to make a patient healthy or make a healthy person sick without recovery. There are words in the world that are very impudent, ugly, rude and negative. They bring a person into a chilling state of the mirror of the heart of the heart, even without leaving the tongue. It is necessary for everyone to understand the expression of the power of words. The reason is it is possible to destroy the whole world with just one lie or a joke word. The word means the power of power.

It is worth noting that it is necessary for each person to wish peace not only to himself, but to the whole world.

In vain, our people did not argue: ‘El peaceful – you peaceful.’ In fact, every wish and desire are intertwined. To make a patient healthy in a single word or to make a healthy person sick without recovery mumkin. Power is an example of a sharp sword or dagger.

It is not a word to break up the heart of the heart with this word. For this reason, it is necessary that we first think and then slaughter each of our words, each sentence. Treatment is an example of human blindness. The culture of circulation is not emphasized in vain.

The meaning content of each word cannot even be equal to baggy languages. As we have already noted, the power of words, the magic of words, the world-the world has the power to destroy castles, luxuries.

Describing our word, our treatment as the embodiment of our own image-urine, it does not require any difference. The reason is that everyone is treated based on the upbringing he received, his condition in the family, his treatment with those around him. ‘The more perfect the upbringing, the happier the people live, says sages.

In order for the upbringing to be perfect, it is never allowed to create a gap in this matter,’ the Honourable President notes. Indeed, the atmosphere in the family does not fail to affect the upbringing of the future generation. After all, therefore, each of us should pay attention to our treatment<sup>7</sup>.

Radical reform and improvement of activities covering all socio-economic processes in the period when the head of our state is moving rapidly,

We can see this in the policy of our state, which is being carried out to this day, in the work that is being carried out practically, in the work that is being done, in the work that is being done to please our people. There is an area within these that is considered a great force in the management of society. It is spirituality.

We are all witnesses to the fact that spiritual and educational work is one of the issues of the policy of our state at the level of economic, political affairs. In any activity, spiritual issues work on the basis of the implementation of activities at one level or another.

<sup>7</sup> Nazabekov O. E’tibor va rag’bat - avji baland ijod va go’zal hayotga qanoat // Yangi O’zbekiston gazetasi. - Toshkent: 2022. - B. 6

This is due to the organization of spiritual, educational, educational processes among the family, kindergarten, school, Lyceum, higher education, people living in this land in general. The parent carries out explanatory work on the child, whose order is violated in the family. In educational institutions, with such children, poor people in this area carry out explanatory work.

Adults are also influenced by leaders or others by conducting explanatory work. Well, some process is influenced by explaining, promoting something, convincing, proving its negative aspects. It is natural to question what we understand by exposure, how it is carried out. It is correct to say that this is done mainly by organizing events. Because, in order to prevent any events and phenomena, preventive work is carried out, that is, explanatory work is carried out. And it is advisable to organize explanatory work not as a simple lecture, but using compositions, concerts, stage performances and various other methods dedicated to any topic.

What do we mean by a cultural event?

"Cultural events are the scope of work organized with a clear plan, a goal in mind. Cultural activities educate people,

The fact that the level of events held in so many cases is at a low level - the organizers of the event do not know the basics of organizing cultural events, do not fully use the methods and means of organizing, cannot achieve the harmony of creative and organizational work, do not know well the staging work, issues of ideological interpretation<sup>8</sup>.

The role of cultural activities in human education, especially in youth education, is important. Raising young people in a spirit of respect for national and universal values and on the basis of ethics, developing a firm belief and vision of life in the younger generation, the ability to resist harmful influences and currents alien to our mentality, is one of the main priorities of all educators and thinkers of cultural and educational work.

In this respect, the organization of cultural events, the ability to apply resources of educational importance even in the creation of its dramaturgy, in which the tasks aimed at etiquette, morality, community development, making people educated, educated, armed with spirituality, raising a perfect person do not lose relevance.

The Explanatory Dictionary of the Uzbek language says that "event" - a means of accomplishing, realizing something, a goal – is therefore a well-thought-out, developed set of practical measures.

"Event " in other sources:

1. (Management, Office; thrift; remedy, Grace, guidance; manner of action). Guidance and measure for implementation, realization";
2. "Work on the path to the implementation of the goal, the behavior itself".
- 3." Work, works that are carried out (carried out) organizationally for a specific purpose, " is given.

**Conclusion;** an example of high attention and care that is being paid to the industry today we have cited a number of examples above. Related to the development of such a field measures and high attention and signed decrees, implementation of decisions extensive work is being carried out within the framework of the provision. Head of State the care and opportunities offered by the industry are fundamental in the near future it will not be a mistake to say that it will lead to changes and show its effect.

Such young maturing like us with high attention and confidence professionals and industry workers also work with more enthusiasm, culture and the field of art needs to mobilize all its strength and potential for Prosperity. Such that as noted by our esteemed President, " New Uzbekistan is the world strong, potential, worthy reputation in the field, all-round becomes a prosperous and prosperous country".
