**THE IMPORTANCE OF TEACHING PRIMARY CLASS STUDENTS THROUGH
INNOVATIVE TECHNOLOGIES**

Polvonova Charos Bahromqulovna

Asia International University Education and education theory direction
2nd year graduate student

Abstract : This in the article initial class students innovative technologies using of teaching importance and advantages analysis will be done . Innovative technologies education in the process how new opportunities creation of students motivation to increase and knowledge get process interesting and efficient to do seeing will be released . The article is also innovative technologies apply attention to methodology looks

Key words : Primary class , innovative technologies , training styles , education process , motivation , interactive methods .

Login :

Modern education in the system innovative of technologies role more and more increased is going Especially the beginning class students for teaching in the process this technologies apply important important have This article innovative of technologies to education integration through children knowledge strengthening and their interest increase ways seeing comes out

Main part :

1. Innovative Technologies Meaning :

Innovative technologies are modern science and culture achievements used without created new method and are tools . They are between multimedia resources , interactive posters , computer programs and online platforms there is .

2. Primary Class Students For Significance :

- Motivation : Innovative technologies using lessons more interesting to do can Students creativity with to engage in encouraged .

- Interactivity : In lessons interactive methods application through students active participation that 's enough while their attention strengthens

- Individual Approach : Each one individual approach to the child opportunity appear will be different level tasks to give through each one of the student from potential maximum level to use is achieved .

3. Application Methodology :

- Lesson Planning : Innovative lesson plans work output ; for example , multimedia presentations or online from the tests use

- Practical Activities : Game in the form of done to be increased training through education improvement .

- Mutually Effect : Teacher and students between communication enhancer tools using lessons organize to achieve

Date: 3rdDecember-2024

Primary class students innovative technologies through teaching education of the process efficiency increase and modern requirements satisfy for important important have Below this explaining let's go :

1. Students interest increase

Innovative technologies , for example , interactive blackboards , virtual and addition reality (VR/AR), multimedia tools students study to the process more active attraction does Young children for interesting and colorful exhibitions through topics to understand it becomes easier .

2. Individualized education opportunity

Electronic resources and special programs using each one of the child knowledge level and needs customized education organize reach can For example , online platforms through differential teaching done is increased .

3. Skills development

Innovative technologies through not only theoretical knowledge , perhaps practical skills are also developed . For example :

- **Creativity** : Graphics design programs or another creative tools through .
- **Logical thinking** : Programming and coding the basics learning with .

4. Interactive education environment create

Lesson process activator technologies :

- Electronic tests and games through education quality increase
- Remote teaching opportunities , especially the pandemic or another restrictions during

5. Lesson efficiency increase

Teacher to class preparation to see and the material present reach in the process the time saves . With that together , automated inspection through systems (for example , tests). of students knowledge degree fast evaluation can

6. Information technologies with introduction

Children from youth to the IT field orientation modern in the world very important They are computer literacy from technology use get skills develops .

Summary :

Primary class students innovative technologies through teaching not only their knowledge degree increases , perhaps their creativity develops and motivation strengthens This in the article given thoughts based on to say maybe modern education system efficiency increase for innovative solutions current to do is necessary . Of these all of them future generation successful to educate service does.
