PERSONAL CONCEPT**

**Turdiyev Victory Erkinovich**

Bukhara state university independent researcher

**Abstract:** This in the article convict of the person to the formation impact provider socio-psychological determinants analysis Conviction to the state take incoming internal ( psychological ) and external ( social ) factors is determined , as well as the crime happened in the making motivational factors and social of the environment place seeing is released . Article within especially the person socialization , childhood during the period upbringing , stress factors and environment impact important factors as is evaluated . Research results punishment execution to grow in institutions psychological rehabilitation programs to improve aimed at recommendations own inside takes .

**Key words :** Convicted personality , social determinants , psychological factors , crime , rehabilitation .

**Login**

Today on the day crime level growth person psychology and social environment between complicated connections to study to necessity is turning . Crime happened reached psychological well-being of individuals ( convicts ) portrait create , their personal characteristics , social environment with their connections analysis to do socio-psychological determinants in determining important place The article target — convict of the person in the formation main role playing social and psychological factors is to determine .

**1. Convicted personality concept and theoretical approaches**

**1.1. Convicted of the person psychological portrait**

Convicts often aggressiveness , impulsivity , empathy deficiency , psychological protection mechanisms violation such as to the features has will be . Their most are normal social in relationships to difficulties face came , childhood during psychological trauma or neglect from the head forgiven .

**1.2. Social Determinants : Family , school and environment**

To crime take incoming social determinants as the following confession is being done :

- Unhealthy family environment ( violence , indifference , control) shortage ),
- Negative social groups impact ( criminal groups , local mafias ),
- At school social adaptive problems ,
- Poverty , unemployment and marginalization .

**1.3. Psychological determiners : Personal factors**

Personal psychological features to crime in a tendency important role plays . To this the following includes :

Date: 23<sup>rd</sup> September-2025

- Low level himself self-awareness ,
- Himself management shortage ,
- Emotional of balance violation ,
- Traumatic events and their consequences .

## **2. Methodology**

In the study good quality and quantitative methods harmony based on processing Questionnaire , half structural interviews and psychological 50 people through tests ( e.g. MMPI, AQ test) punishment execution to grow in the institution convicts The study was conducted in Tashkent region . one punishment execution to grow in the colony take gone .

## **3. Research results**

- Research done 68% of prisoners were incarcerated as children family violence witness or victim was .
- 72% of cases convicts crime happened from reaching before social insulation in the case of was ( i.e. permanent work place or social connection no ).
- Psychological test results their most of high level aggression , self evaluation low and emotional to instability has that showed .
- Also , crime happened of reaching motivational reasons " revenge " , " equality" among for "fight " , " escape " socio-psychological concepts advantage did .

## **4. Discussion**

This results convict personality in the formation social and psychological determinants how that they are in harmony shows . Social factors ( e.g. , family , school , work) place lack of ) is enough at the level positive role not playing , as a result person psychological in terms of to crime inclined was in a way formed This is determined . and to crime against in the fight only punishment not , maybe psychological help , social rehabilitation and preventive measures to strengthen demand will reach .

## **Conclusion**

Convicted personality in the formation complicated and many factorial system action does . In this social determinants ( family , environment , social role ) and psychological determinants ( emotional balance , personal to oneself evaluation , experience ) mutual under the influence will be . Research results based on punishment execution to grow in institutions socio-psychological rehabilitation programs create and to crime take incoming factors early determination mechanisms working exit necessary .
